### **Roof Inspection:**

A roof inspection was performed on 06/04/19 @ appx. 7:30 a.m., weather was clear and dry and temperature of 70. Our findings are as follows:

- This roof is of an Architectural shingle, driftwood in color and is in very good condition.
- There are stains from pine straw , which are unavoidable.
- There are several maintenance subjects to be repaired
- The plumbing stack flanges need to be sealed which is a usual occurrence at the 10-12 years of age
- There are several indentions from the original application, which are not of great concern
- In my knowledge, this roof has 10 or so years with exceptions of the acts of nature
